PROFESSIONAL SUMMARY

Aspiring Software Engineer with hands-on experience building full-stack web applications and RESTful APIs using ASP.NET Core, C#, and React. Developed production-grade backend systems featuring JWT authentication and NLP integrations. Published researcher with demonstrated ability to deliver scalable, maintainable software in agile team environments.

TECHNICAL SKILLS

Languages: C#, JavaScript, SQL

Frameworks & Libraries: ASP.NET Core, Entity Framework Core, React.js

Backend: REST API Design, MVC Architecture, JWT Authentication, Dependency Injection, OOP

Database: MySQL, PostgreSQL, SQL Server

Tools & Platforms: Git, GitHub, Postman, Swagger, VS Code

Methodologies: Agile, Scrum, SDLC, Data Structures & Algorithms

EXPERIENCE

Software Intern — .NET & Full-Stack Development — Svestran IT Solutions.

Dec 2025 – Present

- Engineered and maintained RESTful API endpoints for Svesfit, a gym management platform, using ASP.NET Core and C#, applying MVC architecture, OOP principles, and Dependency Injection within a Scrum-based agile team
- Implemented OTP-based authentication and JWT-secured access control on the Svesfit backend, strengthening platform security and enforcing verified user sessions
- Assisted in rebuilding the company landing page and contributed React.js UI components including dashboard screens for the Svesfit application, coordinating with design and QA teams through Postman and Swagger-based API validation

Software Intern — Artificial Intelligence — Amiers Society.

May 2025 – Jul 2025

- Assisted in training and evaluating NLP-based conversational models using Hugging Face Transformers for domain-specific query handling tasks
- Contributed to a computer vision pipeline for real-time object detection using YOLOv5 and OpenCV under team supervision

PROJECTS

DataExtractor — Text-to-SQL Query System | ASP.NET Core, C#, React, MySQL, Groq AI, JWT |

[GitHub](#) | [Live Demo](#)

- Engineered a full-stack NLP web application enabling plain-English MySQL querying via schema-aware Groq AI prompting, eliminating SQL knowledge requirements for non-technical end users
- Architected a three-tier REST API backend handling schema introspection, NLP query processing, and secure result delivery with JWT authentication and read-only query enforcement
- Research paper published in JCES Vol. 1, Issue 4 (2026) — zenodo.org/records/19613206

Inventory Management System | ASP.NET Core 9, React 19, PostgreSQL, Entity Framework Core, JWT |

[GitHub](#)

- Built and deployed a full-stack retail management system with REST API backend, EF Core code-first migrations, JWT authentication, barcode scanning via camera, PDF invoice generation, and real-time inventory alerts
- Digitized end-to-end shop operations for a live cosmetics business — replacing manual workflows with a mobile-first billing system featuring dual pricing modes, 30-day sales analytics, expiry monitoring, and dead stock detection; actively used daily by the business owner

EDUCATION

B.Tech in Computer Science and Engineering

2022 – 2026

Andhra Loyola Institute of Engineering and Technology, Vijayawada

CGPA: 7.46

CERTIFICATIONS & ACHIEVEMENTS

- Best Student Award — Cybersecurity Level 1 Hackathon, Supraja Technologies
- Introduction to Artificial Intelligence — Infosys Springboard
- Introduction to Natural Language Processing — Infosys Springboard
