

Kiran Pinisetty

.NET Full Stack Developer

Hyderabad, India | +91 99894 55477 | kiranpinisetty@gmail.com
linkedin.com/in/kiranpinisetty | github.com/kiranpinisetty | kiranpinisetty.dev

PROFESSIONAL SUMMARY

Entry-level .NET Developer with hands-on internship experience in ASP.NET Core, C#, and React.js, building REST APIs and JWT-secured authentication for a production platform in an Agile/Scrum team. Additional project experience across full-stack development, database design (MySQL, PostgreSQL, SQL Server), and Entity Framework Core, including an NLP-based Text-to-SQL query execution system with published research in JCES (2026).

TECHNICAL SKILLS

- **Languages:** C#, JavaScript
- **Web Technologies:** HTML, CSS
- **Frameworks & Libraries:** ASP.NET Core, Entity Framework Core, React.js
- **Backend:** REST API Design, MVC Architecture, JWT Authentication, Dependency Injection, OOP
- **Database:** MySQL, PostgreSQL
- **Tools & Platforms:** Git, GitHub, Postman, Swagger, VS Code

EXPERIENCE

Software Development Intern (.NET & Full-Stack) — Svestran IT Solutions, Vijayawada Dec 2025 – Jun 2026

- Developed and maintained RESTful API endpoints for Svesfit, a gym management platform, using ASP.NET Core and C#, applying MVC architecture and Dependency Injection within a 4–6 member Agile/Scrum team at a startup
- Collaborated with a senior developer to implement OTP-based authentication and JWT-secured access control, strengthening platform security and enforcing verified user sessions
- Built React.js components including the main admin dashboard and a staff attendance tracking page, validating API integrations using Postman and Swagger

AI Intern — Amiers Society, Vijayawada

May 2025 – Jul 2025

- Trained a custom YOLOv8 object detection model using Ultralytics HUB on a labeled image dataset of umpire hand gestures, enabling real-time gesture recognition via webcam or static image input

PROJECTS

DataExtractor — Text-to-SQL Query Execution System ASP.NET Core, C#, React (Vite), MySQL, Groq AI, JWT github.com/kiranpinisetty/data-extractor

- Built a full-stack NLP application that translates plain-English questions into SQL using schema-aware Groq AI prompting — sending only database schema (not data) to the LLM to preserve data privacy
- Implemented read-only query enforcement (SELECT-only), SQL trace transparency, a schema explorer, session query history, and CSV export, with JWT-based authentication and support for multiple simultaneous database connections
- Tested across 6 public Kaggle datasets of varying schema complexity, achieving ~80% query accuracy on complex multi-table schemas
- Undergraduate capstone project; research published in JCES, Vol. 1, Issue 4 (2026) — zenodo.org/records/19613206

Inventory Management System

ASP.NET Core 9, React 19, PostgreSQL, Entity Framework Core, JWT

github.com/kiranpinisetty/inventory-management-system

- Built a full-stack CRUD application for product and inventory management with JWT authentication
- Implemented billing functionality that automatically updates stock levels on each sale, with PDF invoice generation

EDUCATION

B.Tech, Computer Science and Engineering

2022 – 2026

Andhra Loyola Institute of Engineering and Technology, Vijayawada | CGPA: 7.46

CERTIFICATIONS

- Best Student Award — Cybersecurity Level 1 Hackathon, Supraja Technologies
- Introduction to AI & NLP — Infosys Springboard
